

How to Make Cheap One-Use Water Bowls for Transport Carriers – Cats or puppies

These cost about 55 cents each. They can still be broken off, mostly by larger cats and dogs but they sit against the carrier door better than round plastic cups. Easy to remove with a box cutter.

Supplies

Plastic square condiment bowls; order from Amazon – 20 per package (link below)

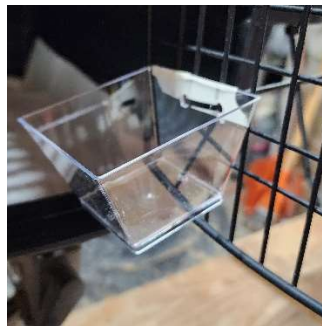

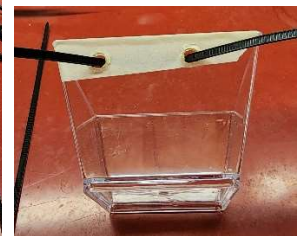

Zip Ties

Masking Tape (Optional)

Craft Burning Tool or Pin, usually used for wood (Tried a punch tool but tends to break cup)

The masking tape reduces breakage. Put tape on top lip of 1 side of cup. Use burning tool to create 2 holes on that 1 side close to the lip. Insert zip tie. Attach to inside of carrier door.
