

The Synexis Biodefense technology is designed to provide a cleaner environment for every occupant. Our patented system is the only technology to produce Dry Hydrogen Peroxide (DHP) from the humidity in the air to reduce the percent of bacteria, viruses and mold in the air and on surfaces.

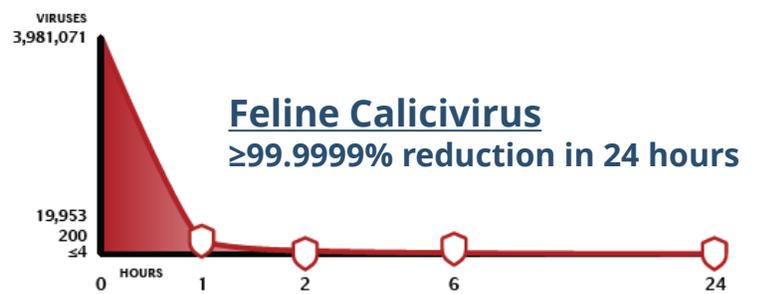

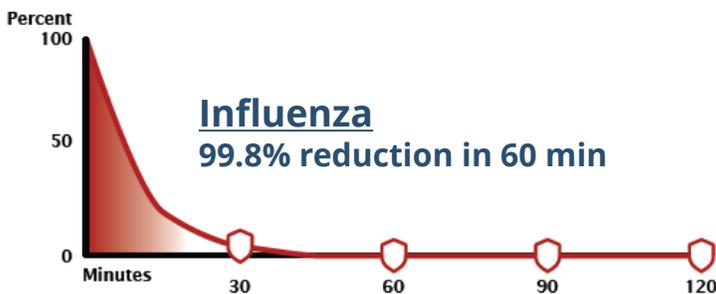

**STANDALONE  
DEVICE**

### Benefits of a Synexis Biodefense System

- Continuous sanitation of occupied facilities without disturbing normal operation
- Reduces risk of cross contamination and recontamination
- Naturally mitigates odors and insects
- Comfort and safety of humans and animals
- Flexibility and ease of operation
- No odors, chemicals, or solvents
- No labor commitment
- Highly scalable

### Mitigation of Pathogens Relevant to Companion Animals

- Influenza (all strains)
- Bordetella
- MRSA
- Feline Calicivirus
- Parvovirus (canine & feline)
- Salmonella
- Aspergillus
- Distemper
- DHP has been effective against every species of dry microbe on which it has been tested

### Pricing & Installation Details

Pricing for a Synexis Biodefense system is based on a lease model and is priced per square foot of treated space per month. Pricing includes installation, maintenance and regular sail replacement.

Synexis Biodefense systems are installed inline with a building's HVAC system at the diffuser level. In cases where an HVAC system is not present, standalone devices can be installed.
