Veterinary Clinics on and surrounding the Navajo Nation

Demographics on the Navajo Nation: 27,000 square mile land base – the size of West Virginia, 404,000 enrolled tribal members with 180,000 Navajos living on the reservation since the COVID-19 pandemic. The Navajo Nation was undercounted in 2020 census which is an extreme impact to our People. 48.5% unemployment rate / average household income of \$8,240

Obstacles to obtaining veterinary care on Navajo:

1. Limited number of veterinarians on the reservation
2. Distance to travel to a vet clinic
3. Expense of animal treatment, gasoline cost & logistics to wait for an animal to be treated
4. COVID-19 pandemic impacts on Navajo
