

We're Helping Outdoor Cats

Ways You Can Help

The Roanoke Valley SPCA Community Cat Crew will humanely trap, neuter, and return community cats in your neighborhood on

DATE

Trap-Neuter-Return benefits the cats and the neighborhood. All of the community cats—also called feral cats—are going to be spayed or neutered, vaccinated, eartipped (the universal symbol of a neutered and vaccinated cat) and returned to their outdoor home. Back in their outdoor home, they will not reproduce—no more kittens! Trap-Neuter-Return improves their lives and yours. It is effective and humane. Other approaches for community cats just don't work.

You can help make this a success!

Keep your pet cats inside on the above date (so they won't be accidentally trapped.)

Contact us if you are feeding any cats in the neighborhood or surrounding areas. The more we know about where the cats eat and spend their time, the more successful we'll be.

Don't feed the outdoor cats on the day before trapping (always continue to provide water). Community cats will enter traps only when they are hungry. Move your pet cat's feeding inside on the above date if you normally feed outside. Once our trapping day is over, you can go back to feeding the cats.

Thank you! Your cooperation is vital to making your neighborhood a better, safer, healthier home for cats and people!
